Acibadem Altunizade Hospital, İstanbul

DEPARTMENT
Anesthesiology & Reanimation

CLINICAL FOCUS

The core of Dr. Yaycı's practice is perioperative anesthesia care. This refers to the anesthetic management of patients around the time of a procedure: the period before anesthesia is given, the administration and monitoring of anesthesia during the procedure itself, and the phase of recovery that follows.

His work also includes reanimation and intensive care. Reanimation and intensive care are concerned with the support and monitoring of patients whose condition requires close observation, for example after a procedure or when vital functions need to be supported. Dr.
