CLINICAL FOCUS

Dr. Oktay's clinical work covers general urology, endourology and transplant coordination. Endourology refers to minimally invasive urological procedures performed through natural openings or small access points, and his published work in this area includes a case report on colonic perforation during pediatric percutaneous nephrolithotomy and its treatment, and a report on...

His transplant-related publications include a report on ureteric aspergilloma as an unusual cause of ureteral obstruction in a renal transplant recipient, and a review of superimposed infections in a renal transplant recipient with pulmonary tuberculosis and visceral leishmaniasis.
