CLINICAL FOCUS

A large part of Dr. Aghayeva's practice involves diseases of the digestive tract and colorectal surgery. She assesses and treats patients with inflammatory bowel disease, including Crohn's disease and ulcerative colitis, where surgery may be considered when medical treatment is not sufficient.

Dr. Aghayeva's practice also includes endocrine surgery, in particular thyroid disease and thyroid surgery, and bariatric surgery for patients with obesity, including sleeve gastrectomy. In each case, the decision on whether an operation is suitable, and which approach to use, depends on the individual patient's diagnosis, general...
