Cardiology Department

CLINICAL FOCUS

A large part of Dr. Akyol's practice concerns coronary artery disease, atherosclerosis and angina. He also assesses and manages patients with heart failure, and with structural conditions such as heart valve diseases, aortic stenosis, rheumatic heart disease and atrial septal defect.

His second main area is heart rhythm. He sees patients with arrhythmias, including atrial fibrillation, and his procedural work includes catheter ablation and pacemaker therapy. Which approach is appropriate depends on the individual patient's findings, and treatment decisions are made after a full review of the history, examination and...

Atrial septal defect Heart failure Rheumatic heart disease
Aortic stenosis Heart valve diseases

CONDITIONS TREATED

Atrial septal defect Heart failure Rheumatic heart disease
Aortic stenosis Heart valve diseases
