Hospital, İstanbul

DEPARTMENT
Otorhinolaryngology (ENT)

CLINICAL FOCUS

A substantial part of Dr. Demirbağ's practice concerns the nose and sinuses. He evaluates and treats patients with sinusitis and performs nasal and sinus surgery where a surgical approach is considered appropriate after examination and review of imaging. He also performs rhinoplasty, and assesses patients with smell and taste disorders, which may be related to nasal or sinus disease.

In otology, Dr. Demirbağ sees children with hearing loss and adults with tinnitus, and he performs middle ear surgery. He assesses patients with vertigo and balance disorders, where the evaluation focuses on distinguishing inner ear causes from other possible explanations. His throat practice includes the evaluation of hoarseness and voice changes, and tonsil surgery in patients for whom this is indicated.

INTERNATIONAL PATIENTS

Dr. Demirbağ consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as CT or MRI reports, hearing test results, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
