CLINICAL FOCUS

The first of Dr. Yeğınboy's two listed areas of expertise is breast diseases. This is a broad field that covers both benign and malignant conditions of the breast. In practice, the evaluation of a breast complaint usually begins with a review of the patient's history, a clinical examination and an assessment of any existing imaging or...

His second listed area is general surgical conditions. General surgery covers a range of conditions that may be managed with or without an operation, and the approach in each case depends on the diagnosis, the patient's overall health and the results of prior investigations.
