Pediatrics

CLINICAL FOCUS

A large part of Dr. Şan's work concerns well-child follow-up: scheduled visits at which growth, development and general health are reviewed in an age-appropriate way. He diagnoses and treats childhood infectious diseases, which account for many of the acute visits in a pediatric clinic, and he monitors children with nutritional disorders, following weight, feeding patterns and...

Dr. Şan also provides newborn follow-up. This includes newborn screening tests, the routine checks carried out in the first days and weeks of life, and the treatment of newborn jaundice, where the bilirubin level is monitored and treatment is planned according to the baby's age and clinical findings.

Diagnosis and treatment of childhood infectious diseases

Pediatric nutritional disorders monitoring

Constipation in children

Infant colic

INTERNATIONAL PATIENTS

Dr. Şan consults in Turkish and English, and interpreters can be arranged for families who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound or X-ray reports, laboratory results and discharge summaries, and arranges appointments and...
