Acibadem Atasehir
Hospital, İstanbul

DEPARTMENT

Inpatient Clinic Physicians

CLINICAL FOCUS

Dr. Küçükköse's clinical activity is focused on inpatient medical care. This involves the day-to-day medical management of patients who have been admitted to the hospital, including reviewing their history and current medications, examining them, and coordinating with the specialist responsible for their treatment.

A second area of his work is hospital patient monitoring and clinical follow-up. During an admission, a patient's condition is observed regularly, and vital signs, laboratory results and clinical findings are reviewed as they become available. Dr. Küçükköse takes part in this ongoing observation, identifies changes that may need attention and communicates them to the relevant specialist.

INTERNATIONAL PATIENTS

Dr. Küçükköse consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a hospital visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments...
