HOSPITAL  
Acibadem Kent Hospital  
(Izmir)

DEPARTMENT  
General Surgery

## CLINICAL FOCUS

Dr. Uzun's clinical work centers on surgery of the digestive system. He evaluates and treats patients with cholecystitis, inguinal hernia and umbilical hernia, and his practice includes colorectal surgery as well as gastroenterology and coloproctology surgery. Within the field of anorectal disease, he provides hemorrhoid treatment and the assessment and treatment of other anorectal conditions.

His practice also includes endocrine surgery, in particular thyroid surgery, and oncological surgery. The approach chosen for a given patient depends on the diagnosis, the findings of the clinical examination and imaging, and the patient's overall health. Dr. Uzun discusses the available options with each patient before a decision on treatment is made, and not every patient who is evaluated will be advised to have surgery.

Colorectal Surgery

## INTERNATIONAL PATIENTS

Dr. Uzun consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, CT or MRI reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
