Hospital, İstanbul

DEPARTMENT
Cardiology Department

CLINICAL FOCUS

A significant part of Dr. Bilge's work concerns arrhythmias, including atrial fibrillation. Evaluation of an irregular, unusually fast or unusually slow heartbeat generally begins with a review of the patient's symptoms and recordings of the heart's electrical activity.

Dr. Bilge also treats coronary artery disease and the atherosclerosis that underlies it, including angina and myocardial infarction. Coronary angiography is used in his practice to visualize the coronary arteries and to clarify the location and extent of any narrowing.

Arrhythmias Atrial fibrillation Catheter ablation
Pacemaker implantation Heart failure

CONDITIONS TREATED

Arrhythmias Atrial fibrillation Heart failure
Coronary artery disease Atherosclerosis
