CLINICAL FOCUS

Internal medicine is the specialty concerned with the diagnosis and non-surgical management of medical conditions in adults. Within this field, Dr. Kurt sees adult patients with a wide variety of internal medicine concerns. His approach is built around a structured assessment: taking a detailed medical history, reviewing symptoms and any previous findings, performing a clinical examination, and considering which further...

Because internal medicine concerns can involve more than one organ system, Dr. Kurt's work also includes coordinating care within the Internal Medicine unit and communicating clearly with patients about their health concerns. The aim of each evaluation is to reach an understanding of the patient's situation that is grounded in the history, the examination, and the available results, and to explain that understanding in plain...

INTERNATIONAL PATIENTS

Dr. Kurt consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior medical reports and imaging, arranges appointments, and organizes the hospital visit so that the relevant information is available when the patient arrives.
