CLINICAL FOCUS

Dr. Odabaşı's listed areas of expertise cover ear diseases, nose diseases and throat diseases, together with otologic and neurotologic disorders. His fellowship training in otology and neurotology relates to conditions of the ear and its connection to hearing and balance pathways, which is reflected in his clinical profile.

His expertise also extends to head and neck disorders and head and neck surgery. As with any ENT condition, whether a surgical or a non-surgical approach is appropriate depends on the individual findings, and this is assessed case by case after examination and review of existing records.
