CLINICAL FOCUS

Dr. Özveren's areas of expertise span many of the common solid tumors. In thoracic oncology he treats lung cancer and other thoracic cancers. His gastrointestinal work includes gastric cancer, colorectal cancer (cancers of the colon and rectum), liver cancer and pancreatic cancer. He also manages breast cancer and prostate cancer, the gynecologic cancers ovarian cancer and uterine cancer, as well as head and neck cancers.

Medical oncology is concerned with the systemic (drug-based) treatment of cancer. The approach that is appropriate for an individual patient depends on the type and stage of the tumor, the pathology findings, any previous treatment and the patient's general health.

Ovarian cancer Lung cancer Thoracic cancers
Head and neck cancers Uterine cancer

INTERNATIONAL PATIENTS

Dr. Özveren consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, arranges appointments and...
