DEPARTMENT
Cardiovascular Surgery

CLINICAL FOCUS

Dr. Güllü's clinical work spans the heart and the major blood vessels. In aortic surgery he treats aortic aneurysm and aortic valve stenosis, and his publications reflect a particular interest in acute type A aortic dissection, including questions of operating temperature, cannulation technique and cerebral perfusion.

On the venous and lymphatic side, he offers varicose vein treatment and lymphedema treatment. Cardiopulmonary rehabilitation is also among his areas of expertise, addressing recovery of heart and lung function after cardiac or vascular procedures.
