CLINICAL FOCUS

The two areas of expertise listed for Dr. Kenir Çelik are preventive oral health care and dental diagnosis. Preventive oral health care is concerned with maintaining the health of the teeth, gums and surrounding tissues and with identifying early changes before they progress.

Because a diagnostic visit is often the starting point for any further dental treatment, patients frequently ask about restorative or cosmetic options during this stage. General information about treatments such as E-Max Crowns, Composite Bonding, Laminate Veneers and Full Mouth Reconstruction is available on this site.

Preventive oral health care

Dental diagnosis

INTERNATIONAL PATIENTS

Dr. Çelik consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as X-ray reports, previous dental records and any relevant laboratory results, and arranges appointments and the hospital visit itself.

CONDITIONS TREATED

Oral leukoplakia

Tooth abscess

Dental pulpitis

Impacted wisdom tooth
