DEPARTMENT
Cardiology Department

CLINICAL FOCUS

A large part of Dr. Değirmencioğlu's practice concerns diseases of the coronary arteries. He assesses and treats patients with coronary artery disease and atherosclerosis, including those presenting with angina or after a myocardial infarction.

His work further includes heart valve disease, in particular mitral valve regurgitation and aortic stenosis, as well as rhythm disorders such as atrial fibrillation and other arrhythmias. Patients with hypotension are also seen in his clinic.

Myocarditis Mitral valve regurgitation Coronary artery disease
Atherosclerosis Angina

CONDITIONS TREATED

Myocarditis Mitral valve regurgitation Coronary artery disease
Atherosclerosis Angina
