CLINICAL FOCUS

A significant part of Dr. Yüksel's work is breast imaging. He performs and interprets mammography and uses complementary imaging methods in the evaluation of breast diseases. Findings are reported in a way that can support the referring physician in deciding whether further investigation or follow-up is needed.

Dr. Yüksel also works with magnetic resonance imaging, computed tomography and ultrasound imaging, which are used to examine different organs and tissues depending on the clinical question. Another area of his practice is virtual angiography, an imaging approach for visualizing blood vessels. As a diagnostic radiologist, he does not provide treatment himself;

INTERNATIONAL PATIENTS

Dr. Yüksel consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
