CLINICAL FOCUS

Dr. Aydınlar's clinical work covers the assessment and medical management of common and complex cardiac conditions. In patients with heart failure, evaluation typically includes a review of symptoms, cardiac function and current medication, so that treatment can be adjusted to the individual.

Rhythm disorders form another part of his practice, in particular atrial fibrillation and other arrhythmias, which may cause palpitations, breathlessness or fatigue and can carry a risk of complications if they are not addressed. Dr. Aydınlar also manages coronary artery disease, atherosclerosis and angina, together with the risk factors that contribute to them, such as hypertension and hyperlipidaemia.

Aortic valve stenosis

INTERNATIONAL PATIENTS

Dr. Aydınlar consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as ultrasound, MRI, CT or X-ray reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
