İstanbul

DEPARTMENT
Radiology

CLINICAL FOCUS

Dr. Elibol's work centers on diagnostic imaging rather than on treatment itself. A significant part of his practice relates to breast diseases, where he reports mammography and ultrasound imaging to help characterize findings and support the decisions made by the referring clinical team.

Imaging findings are interpreted in the context of the patient's history and symptoms, and the results are communicated to the referring physician, who discusses their implications and any further steps with the patient.
