CLINICAL FOCUS

Dr. Harman's clinical activity covers diagnostic imaging and radiodiagnosis, that is, the acquisition and interpretation of imaging studies to help establish or clarify a diagnosis, as well as interventional radiology, in which image guidance is used to perform minimally invasive diagnostic and therapeutic procedures.

His published work reflects the range of this field. He has co-authored studies on endovascular abdominal aortic repair, ultrasonography-guided thrombin injection for arterial pseudoaneurysms, computed tomography-guided lumbar epidural steroid injections and sacroiliac joint injections for pain management, the diagnosis and treatment of...
