CLINICAL FOCUS

A central part of Dr. Kurtsoy's work is the surgical management of brain tumors, including gliomas, meningiomas, deeply located brain tumors, and pediatric brain tumors. He also treats brain aneurysms and pituitary disorders, and his practice includes craniostomies in children.

In the spine, Dr. Kurtsoy evaluates and treats lumbar spinal canal stenosis and cervical spinal canal stenosis, as well as spine tumors and spinal cord tumors. For these conditions, assessment typically considers neurological findings, imaging results, and any previous treatment before options are outlined.
