Pediatric Orthopedics

HOSPITAL

Acibadem Dr. Sinasi Can
(Kadikoy) Hospital, ...

DEPARTMENT

Orthopedics & Joint Center

CLINICAL FOCUS

Orthopedic surgery and traumatology is concerned with disorders and injuries of the musculoskeletal system, including the bones, joints, and surrounding soft tissues. Within this field, Dr. Çiçek sees patients with orthopedic conditions and injuries, assesses their symptoms and imaging, and discusses the options that may be appropriate for their situation.

His subspecialty interest is Pediatric Orthopedics, which addresses musculoskeletal conditions in children and adolescents. Because the skeleton of a child is still growing, assessment and treatment planning in this age group take development into account, and families are involved in the discussion of findings and possible next steps.

Pediatric orthopedics

INTERNATIONAL PATIENTS

Dr. Çiçek consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior medical reports and imaging, arranges appointments, and organizes the hospital visit in İstanbul.
