CLINICAL FOCUS

Dr. Dinçer's clinical work centers on two cross-sectional imaging methods: computed tomography and magnetic resonance imaging. In this work, an examination is planned according to the clinical question raised by the referring physician, performed with a suitable protocol, and reported so that the findings can inform diagnosis, treatment...

His published work reflects a sustained interest in neuroradiology and in the technical application of MRI. He has co-authored papers on clinical proton MR spectroscopy in central nervous system disorders, single voxel proton MR spectroscopy findings in typical and atypical intracranial meningiomas, 3-Tesla MR imaging of the trigeminal...
