CLINICAL FOCUS

Dr. Akcan's clinical work centers on endocrine surgery, including thyroid surgery. Endocrine surgery addresses conditions of hormone-producing glands that may require an operation; thyroid surgery is one of the principal procedures in this field.

A second area of his practice is oncological surgery and surgery of the breast. Dr. Akcan performs mastectomy for patients whose condition requires removal of breast tissue, and he performs breast reconstruction, which may be discussed as part of overall treatment planning. He also carries out gynecomastia surgery for men with enlargement of breast tissue.

INTERNATIONAL PATIENTS

Dr. Akcan consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, CT or MRI reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
