Hospital, İstanbul

DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

Dr. Koçak sees women with a wide range of gynecological conditions, including menstrual irregularities, pelvic pain and dysfunction, HPV and sexually transmitted infections. He treats endometriosis and provides assessment and treatment for infertility. In urogynecology, his work includes the evaluation and treatment of urinary incontinence and other pelvic floor or bladder-related concerns.

In obstetrics, Dr. Koçak provides pregnancy follow-up and delivery, including delivery options such as epidural, cesarean and water birth, and he manages ectopic pregnancy. His surgical practice includes vNOTES scarless surgery, a form of vaginal laparoscopy in which the procedure is performed through the vagina rather than through abdominal incisions. He also performs genital aesthetic procedures.

vNOTES scarless surgery (vaginal laparoscopy)

Infertility

INTERNATIONAL PATIENTS

Dr. Koçak consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
