CLINICAL FOCUS

Dr. Özbek's clinical work centers on general child and adolescent health, with particular attention to a number of common pediatric conditions. He evaluates and manages childhood constipation, iron deficiency and anemia in children, and urinary incontinence in children.

In the newborn period, Dr. Özbek provides newborn follow-up, carries out newborn screening tests, and treats newborn jaundice. Assessment is tailored to the individual child, and the approach to each condition depends on the child's age, history and examination findings.

Childhood constipation

Iron deficiency and anemia in children

Child and adolescent health

Urinary incontinence in children

Upper respiratory tract illnesses in children

INTERNATIONAL PATIENTS

Dr. Özbek consults in Turkish and English, and interpreters can be arranged for families who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as laboratory and pathology results, ultrasound or X-ray reports, operative notes and discharge...
