Acibadem Kent Hospital (Izmir)

DEPARTMENT
Neurosurgery

CLINICAL FOCUS

Dr. Bedük's cranial work includes the evaluation and treatment of brain aneurysms, brain haemorrhage and brain tumours. He also treats hydrocephalus, a condition in which cerebrospinal fluid accumulates within the brain. A further area of his practice is the treatment of pituitary disorders, which is his listed subspecialty;

In spinal surgery, Dr. Bedük treats lumbar spinal canal stenosis and cervical spinal canal stenosis, spinal and spinal cord tumours, and disc herniation. He also assesses patients with back pain and neck pain, where the aim of a consultation is to identify the underlying cause and to consider whether surgical or non-surgical management...
