Pediatrics

CLINICAL FOCUS

A central part of Dr. Doğan's practice is well-child follow-up, in which growth, development and general health are monitored at age-appropriate intervals. In the neonatal period, his work includes newborn follow-up, newborn screening tests and the treatment of neonatal jaundice.

For older infants, children and adolescents, Dr. Doğan diagnoses and treats childhood infectious diseases, including upper respiratory tract infections, and addresses childhood nutrition disorders and constipation in children. His scope extends to child and adolescent health more broadly.

Well-child follow-up

Childhood nutrition disorders

Diagnosis and treatment of childhood infectious diseases

Constipation in children

Newborn follow-up

INTERNATIONAL PATIENTS

Dr. Doğan speaks Turkish and English, and interpreters can be arranged for families who prefer another language. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as laboratory results, vaccination and growth records, ultrasound reports and discharge summaries, and arranges appointments and the hospital visit.

CONDITIONS TREATED

Childhood asthma

Childhood obesity

Upper respiratory tract infections in children

Constipation in children

Newborn follow-up

Neonatal jaundice treatment
