CLINICAL FOCUS

Asime Kurter's areas of expertise are pediatric hearing loss, hearing loss in general, audiometry and BERA (ABR) testing. Audiometry is a hearing test that measures how well a person hears sounds of different pitches and volumes; it is commonly used to establish whether a hearing loss is present and, if so, its type and degree.

Her work with pediatric hearing loss involves the audiological evaluation of children whose hearing is in question, whether following newborn screening, on the basis of parental concern or after referral from another physician. The results of these tests are interpreted together with the ENT physicians in the unit and form part of the information used when treatment options are discussed.

INTERNATIONAL PATIENTS

Asime Kurter sees patients in Turkish and English, and interpreters can be arranged for other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, including earlier hearing test results, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
