CLINICAL FOCUS

Dr. Karaca's clinical work is centered on family medicine and primary care. This includes assessing new or ongoing symptoms, reviewing a patient's medical history and current medications, and coordinating appropriate follow-up or referral when a condition falls outside the scope of primary care.

A second strand of her practice is preventive health care and functional medicine. In this context, preventive care may involve reviewing risk factors and discussing health maintenance, while functional medicine approaches consider lifestyle, nutrition and other contributing factors alongside conventional assessment.
