CLINICAL FOCUS

Dr. Özata's clinical activity is centered on anesthesiology, reanimation and intensive care. In the field of anesthesiology, this involves the assessment of patients before a procedure, the administration and monitoring of anesthesia during the procedure, and the management of the recovery period afterwards.

Her published work reflects these areas. She is a co-author of Infiltration with ropivacaine plus lornoxicam reduces postoperative pain and opioid consumption (J Anesth, 2005) and of Adenotonsillectomy in a patient with Silver-Russell syndrome and obstructive sleep apnea (Otolaryngology Applications, 2013).
