HOSPITAL
Acibadem Altunizade
Hospital, İstanbul

DEPARTMENT
Physical Medicine &
Rehabilitation

CLINICAL FOCUS

A significant part of the work involves the rehabilitation of patients with neurological injury. In stroke rehabilitation, the aim is to support recovery of movement, balance and everyday function after a stroke, with the program adapted to the individual patient's deficits and stage of recovery.

Musculoskeletal conditions are another area of clinical interest. These include low back pain, osteoarthritis management, rehabilitation after musculoskeletal injuries and post-surgical orthopedic rehabilitation following procedures on joints, bones or soft tissue.

Stroke rehabilitation

Spinal cord injury rehabilitation

Low back pain

Osteoarthritis management

Musculoskeletal injury rehabilitation

INTERNATIONAL PATIENTS

Before travel, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, arranges appointments and organizes the hospital visit.

CONDITIONS TREATED
