### CLINICAL FOCUS

Dr. Usta's listed areas of expertise center on benign gynecological conditions and minimally invasive surgery. These include endometriosis treatment, pelvic pain and dysfunction, menstrual irregularities, menstrual pain, premenstrual syndrome, ectopic pregnancy, Bartholin cyst and painful intercourse.

His surgical work includes robotic surgery and hysterectomy (removal of the womb). Within urogynecology, his expertise covers urinary incontinence. The choice between medical and surgical treatment depends on the individual diagnosis, the symptoms and the patient's own priorities, and is discussed with each patient after assessment.
