CLINICAL FOCUS

Dr. Damlacık's clinical interests lie in cross-sectional and non-invasive imaging. Magnetic resonance imaging (MRI) and tomography are used to obtain detailed images of organs, soft tissues and other structures, which can support diagnosis and help in planning further evaluation or treatment.

Multidetector CT colonography, also referred to as virtual colonoscopy, is a CT-based examination of the colon that produces two- and three-dimensional images of the large bowel. It may be considered in selected patients as an alternative or complement to conventional colonoscopy, depending on the clinical situation and the judgment of the referring physician.

INTERNATIONAL PATIENTS

Dr. Damlacık speaks Turkish and English, and interpreters can be arranged for patients who need support in other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and...
