CLINICAL FOCUS

Ayça Nilay Doğan's areas of expertise are audiometry, hearing loss and pediatric hearing loss. Audiometry is the measurement of hearing, and it forms the basis for describing whether a hearing loss is present, how pronounced it is and which parts of the hearing range are affected.

In children, hearing assessment requires an approach that is adapted to the child's age and ability to cooperate, and results are usually interpreted alongside the family's observations and the wider clinical picture. Ayça Nilay Doğan supports the evaluation of hearing loss in both adults and children through audiometric assessment, working within the ENT unit.

INTERNATIONAL PATIENTS

Ayça Nilay Doğan speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as earlier hearing test results, MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries, and arranges...
