DEPARTMENT
Cardiovascular Surgery

CLINICAL FOCUS

Dr. Özgen's clinical work centers on vascular surgery and on venous conditions. Her areas of expertise include the assessment and treatment of varicose veins and venous insufficiency, which can present with symptoms such as leg heaviness, swelling or visible veins.

She also treats lipedema and lymphedema, two conditions that cause swelling of the limbs and that are often mistaken for one another or for other causes of swelling. In these cases, her role includes establishing the diagnosis, distinguishing between the possible causes of limb swelling and discussing an appropriate management plan.
