Rheumatology Department

CLINICAL FOCUS

Dr. Ünlüer's areas of expertise cover a broad range of rheumatic and autoimmune conditions. These include rheumatoid arthritis, ankylosing spondylitis, systemic sclerosis (scleroderma) and vasculitis.

Many of these conditions are chronic and can present with overlapping symptoms, so evaluation typically involves a detailed history, a clinical examination and a review of laboratory and imaging findings before a diagnosis is discussed.

Familial Mediterranean fever (FMF)

Ankylosing spondylitis

Behçet's disease

Autoimmune diseases

Autoimmune pancreatitis

CONDITIONS TREATED
