CLINICAL FOCUS

A central area of Dr. Kuş's practice is gastrointestinal oncology imaging, in which cross-sectional imaging is used to assess the digestive organs in patients with known or suspected tumors and to support the treating team in planning and follow-up. Within this field she has a specific interest in multidetector CT colonography, also referred to as virtual colonoscopy.

Dr. Kuş also works with magnetic resonance imaging (MRI) and computed tomography (CT) more broadly. Her role as a radiologist involves interpreting these studies and providing written reports to the clinicians responsible for a patient's care; the choice of imaging method is made according to the individual situation.

Computed tomography (CT)

INTERNATIONAL PATIENTS

Dr. Kuş consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
