Teeth whitening · Dental fillings

HOSPITAL

Acibadem Atasehir Hospital, İstanbul

DEPARTMENT

Dental & Oral Health

CLINICAL FOCUS

Endodontic care is a central part of her work. Dr. Gümüş assesses tooth root infections and, where indicated, carries out root canal treatment with the aim of preserving the natural tooth. Alongside this, she treats damaged teeth and enamel loss using restorative approaches, including dental fillings and porcelain inlays and onlays.

Her practice also covers teeth grinding treatment. Depending on the assessment, options may include night guards for teeth grinding or Botox applications for teeth grinding. Dr. Gümüş also evaluates bad breath and discusses possible contributing dental factors, and she offers teeth whitening for patients who wish to address the color of their teeth.

Dental fillings

Teeth grinding treatment

Night guards for teeth grinding

Botox for teeth grinding

INTERNATIONAL PATIENTS

Dr. Gümüş consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior dental reports and imaging, arranges appointments and organises the hospital visit.

CONDITIONS TREATED

Night guards for teeth grinding

Bad breath

Tooth root infection

Enamel loss
