CLINICAL FOCUS

Dr. Öner evaluates and treats conditions of the retina and choroid. The conditions listed in her profile include central serous chorioretinopathy, retinitis pigmentosa, age-related macular degeneration and diabetic retinopathy, together with the broader group of vitreoretinal disorders.

Electrodiagnostic assessment forms a further part of her practice.

Electroretinography records the electrical responses of the retina to light and can help in characterizing inherited and acquired retinal disease, including retinitis pigmentosa.

Central serous chorioretinopathy

Retinitis pigmentosa

Age-related macular degeneration

Diabetic retinopathy

Pterygium

CONDITIONS TREATED

Central retinal vein occlusion

Retinitis pigmentosa

Age-related macular degeneration

Diabetic retinopathy
