Pediatrics

CLINICAL FOCUS

The core of Dr. Topuz's work is pediatric assessment. This involves taking a careful history from the family, examining the child in a manner suited to his or her age and developmental stage, and forming a clinical picture that can guide further evaluation or treatment when needed.

Her clinical focus also covers child health in a broader sense and the evaluation and management of pediatric diseases. Depending on the findings of the initial assessment, this may include ordering or reviewing tests, explaining what the results mean for the child, discussing possible next steps with the family, and, where appropriate, coordinating with other specialties. INTERNATIONAL PATIENTS

Dr. Topuz consults in Turkish and English, and interpreters can be arranged for families who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as ultrasound, X-ray, MRI or CT reports, laboratory and pathology results, and discharge summaries, and arranges appointments and the hospital visit.
