CLINICAL FOCUS

A large part of Dr. Yemişçi's practice involves chronic and inflammatory skin conditions. She assesses and treats acne, eczema, psoriasis, rosacea and urticaria, conditions that often require ongoing care and adjustment of treatment over time.

Her training in venereal diseases is reflected in her work with sexually transmitted infections, including genital herpes, and in the treatment of warts and condyloma. Cryotherapy is among the procedures she uses in the outpatient setting where it is considered appropriate for the individual patient. Dr.
