CLINICAL FOCUS

Dr. Coşkun sees patients with a range of common dental conditions. For tooth decay, she provides dental fillings, and she treats broken teeth and enamel loss with restorations chosen according to the extent of the damage. When a tooth has a dental root infection, she assesses whether the tooth can be preserved with root canal treatment; where a tooth cannot be saved, tooth extraction may be discussed as an alternative.

For patients with missing or heavily damaged teeth, Dr. Coşkun plans crowns and bridges and provides removable dentures. Her work in aesthetic dentistry includes teeth whitening and the aesthetic aspects of restorations such as crowns and fillings.

Tooth extraction

Gum recession

Gingivitis

Dental root infection

INTERNATIONAL PATIENTS

Dr. Coşkun consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays and records of previous dental treatment, arranges appointments and organizes the hospital visit.
