CLINICAL FOCUS

Dr. Sarı's clinical work spans medical and aesthetic dermatology. In medical dermatology, she provides active acne treatment, in which the type and severity of the acne, its duration, and any previous treatments are assessed before a plan is discussed. She also offers pigmentation treatment for uneven skin tone and pigmented spots.

In aesthetic and procedural dermatology, her areas of expertise include botulinum toxin applications, dermal filler applications, fractional laser treatment, gold needle treatment, and anti-aging care. Each of these procedures has specific indications and limitations, and Dr. Sarı reviews whether a given option is suitable for the patient's skin and expectations before it is carried out.

Fractional Laser Treatment

INTERNATIONAL PATIENTS

Dr. Sarı consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports, for example previous dermatology notes, laboratory and pathology results, and any relevant imaging, and arranges appointments and the hospital visit.

CONDITIONS TREATED

Anti-aging care
