DEPARTMENT
Anesthesiology &
Reanimation

CLINICAL FOCUS

The core of Dr. Ünlükaplan's practice is perioperative anesthesia care. Before a procedure, this involves individualized anesthetic planning: reviewing the patient's medical history, current medications, previous experiences with anesthesia and the requirements of the planned operation in order to select an anesthetic approach suited to...

After the operation, post-anesthesia recovery care covers the period in which patients emerge from anesthesia and are observed until they are stable. Dr. Ünlükaplan is also involved in critical care management, the care of patients whose condition requires close observation and organ support in an intensive care setting.
