CLINICAL FOCUS

A central part of Dr. Akbıyık's work is lung surgery, including the surgical management of lung cancer and other thoracic cancers. She also treats chest wall tumors and is involved in the evaluation and treatment of pneumothorax, in which air collects between the lung and the chest wall.

Dr. Akbıyık's areas of interest also include minimally invasive approaches such as robotic surgery and single-port VATS (video-assisted thoracoscopic surgery), which are used in selected cases where the anatomy and the condition allow. She treats diaphragm disorders and chest wall deformities, namely pectus carinatum and pectus excavatum, as well as thoracic outlet syndrome, a condition in which nerves or blood vessels are...

INTERNATIONAL PATIENTS

Dr. Akbıyık consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as CT, MRI, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
