CLINICAL FOCUS

Dr. Pashazade's work centers on diagnostic imaging. In a hospital radiology unit, this involves reviewing imaging examinations, preparing written reports and communicating findings to the referring physicians so that results can be placed in the context of the patient's history, symptoms and previous treatment.

Information about imaging services available at the hospital, such as coronary CT angiography and PET-CT imaging, is described on this site. Which examinations, if any, are appropriate for an individual patient depends on the clinical question and is determined by the referring physician together with the radiology team; not every examination is suitable or necessary in every case.

INTERNATIONAL PATIENTS

Dr. Pashazade consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, including MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
