CLINICAL FOCUS

Dr. Pak's work centers on the assessment and management of acute conditions that present to the emergency service. His areas of expertise include trauma and emergency interventions, in which the first priorities are identifying life-threatening problems, stabilizing the patient, and deciding on the next step of care.

He also has a particular interest in environmental emergencies. These include drowning and related complications, as well as bee stings and tick bites, which may range from local reactions to more serious presentations that require observation, medication, or further investigation.

Drowning

Acute hypoxia

INTERNATIONAL PATIENTS

Dr. Pak consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
