CLINICAL FOCUS

A significant part of Dr. Topuz's practice is devoted to urologic oncology. He evaluates and treats patients with prostate cancer, kidney cancer and bladder cancer. Where appropriate, he uses robotic surgery, an approach in which the surgeon operates using instruments guided through a robotic system.

Benign conditions form the other main strand of his work. He diagnoses and manages benign prostatic hyperplasia, an enlargement of the prostate that can cause urinary symptoms in men as they age, and he treats patients with kidney stones.

Bladder cancer

INTERNATIONAL PATIENTS

Dr. Topuz consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
