CLINICAL FOCUS

A large part of Dr. Öznur's work concerns chronic and inflammatory skin disease. She treats psoriasis, including cases in which medications may play a role, and she has clinical experience with Behçet's disease, a condition in which skin and mucosal findings often guide diagnosis and follow-up.

Dr. Öznur also performs dermatologic aesthetic procedures, including masseter Botox, dermal filler applications, fractional laser treatment and HIFU non-surgical facial rejuvenation. Suitability for these procedures is assessed individually during a consultation, taking into account skin type, medical history and the patient's...
